

AccuCure™

**Accurate, continuous, and controllable UV illumination
for thermal analysis instrumentation**

10.7 cm^2
29c
10.7 mW/cm^2
29c

Photo Cure – provides photo-curing of samples before and during thermal analysis

Modular – directly adaptable to leading DSCs, rheometers, DMAs, and FTIRs

Programmable Profiles – emulate your manufacturing cure process on your thermal analysis instrumentation

Accurate Intensity – precise, on demand, and NIST-tracable

Accurate Wavelength – narrow-band wavelength eliminates harmful or undesired wavelengths

Consistent – on-board computer and internal feedback control provides constant intensity

Accurate Monitoring – intensity is continuously monitored and logged

Long Lasting – LED technology ensures a long lifetime
